Contents Volume 250 2003

Volume 250 No. 1

Plant uptake of sulphur as related to changes in the HI-reducible and total sulphur fractions in soil
K.M. Goh and J. Pamidi **1–13**

Nitrogen release from eucalypt leaves and legume residues as influenced by their biochemical quality and degree of contact with soil
M. Corbeels, A.M. O'Connell, T.S. Grove, D.S. Mendham and S.J. Rance **15–28**

Mineralization of ^{14}C-labelled maize in alkaline saline soils
M.L. Luna-Guido, J. Vega-Estrada, A. Ponce-Mendoza, H. Hernandez-Hernandez, M.-C. Montes-Horcasitas, M. Vaca-Mier and L. Dendooven **29–38**

The dependence of root system properties on root system biomass of 10 North American grassland species
J.M. Craine, D.A. Wedin, F.S. Chapin, III and P.B. Reich **39–47**

A cyclical but asynchronous pattern of fine root and woody biomass production in a hardwood forest of southern Quebec and its relationships with annual variation of temperature and nutrient availability
B. Côté, N. Bélanger, F. Courchesne, J.W. Fyles and W.H. Hendershot **49–57**

Effects of harvesting on nutrient leaching in a Norway spruce (*Picea abies* Karst.) ecosystem on a Lithic Leptosol in the Northern Limestone Alps
K. Katzensteiner **59–73**

Uptake of ^{134}Cs by four species from the Asteraceae and two varieties from the Chenopodiaceae grown in two types of Chinese soil
S. Tang and N.J. Willey **75–81**

Immobilization and phytoavailability of cadmium in variable charge soils. I. Effect of phosphate addition
N.S. Bolan, D.C. Adriano, P. Duraisamy, A. Mani and K. Arulmozhiselvan **83–94**

Conservation of urea-N by immobilization-remobilization in a rice-*Azolla* intercrop
M. Cissé and P.L.G. Vlek **95–104**

Influence of urea on biological N_2 fixation and N transfer from *Azolla* intercropped with rice
M. Cissé and P.L.G. Vlek **105–112**

Soil pH changes associated with lupin and wheat plant materials incorporated in a red–brown earth soil
R.K. Xu and D.R. Coventry 113–119

Developmental changes in plant resistance to water flow in *Pisum sativum* (L.)
C. Ruggiero, S. De Pascale, G. Angelino and A. Maggio 121–128

Changes in specific area and energy of root surface of cereal plants in Al-solution cultures. Water vapor adsorption studies
G. Jozefaciuk and A. Szatanik-Kloc 129–140

Root dynamics in bottomland hardwood forests of the Southeastern United States Coastal Plain
M.K. Burke and J.L. Chambers 141–153

NIR and DRIFT-MIR spectrometry of soils for predicting soil and crop parameters in a flooded field
J.W. van Groenigen, C.S. Mutters, W.R. Horwath and C. van Kessel 155–165

Instructions for authors 167–173

Volume 250 No. 2

Predicting soybean yield in a dry and wet year using a soil productivity index
J. Yang, R.D. Hammer, A.L. Thompson and R.W. Blanchar 175–182

Salinity induced differences in growth, ion distribution and partitioning in barley between the cultivar Maythorpe and its derived mutant Golden Promise
W. Wei, P.E. Bilsborrow, P. Hooley, D.A. Fincham, E. Lombi and B.P. Forster 183–191

Inhibition of Al-induced root elongation and enhancement of Al-induced peroxidase activity in Al-sensitive and Al-resistant barley cultivars are positively correlated
L. Tamás, J. Huttová and I. Mistrík 193–200

Effects of NaCl salinity on ^{15}N-nitrate fluxes and specific root length in the halophyte *Plantago maritima* L.
M. Rubinigg, F. Posthumus, M. Ferschke, J.T.M. Elzenga and I. Stulen 201–213

Phosphorus Efficiency of Cabbage (*Brassica oleraceae* L. var. *capitata*), Carrot (*Daucus carota* L.), and Potato (*Solanum tuberosum* L.)
N. Dechassa, M.K. Schenk, N. Claassen and B. Steingrobe 215–224

Arbuscular mycorrhizae in wheat and field pea crops on a low P soil: increased Zn-uptake but no increase in P-uptake or yield
M.H. Ryan and J.F. Angus 225–239

Seasonal changes in hair roots and mycorrhizal colonization in *Woollsia pungens* (Cav.) F. Muell. (Epacridaceae)
E. Kemp, P. Adam and A.E. Ashford 241–248

Accumulation of copper and zinc from liquid manure in agricultural soils and crop plants
P. Mantovi, G. Bonazzi, E. Maestri and N. Marmiroli **249–257**

Drought resistance of 2-year-old saplings of Mediterranean forest trees in the field: relations between water relations, hydraulics and productivity
M.A. Lo Gullo, S. Salleo, R. Rosso and P. Trifilò **259–272**

Morphological plasticity of wheat and barley roots in response to spatial variation in soil strength
I.J. Bingham and A.G. Bengough **273–282**

Alpine plants show species-level differences in the uptake of organic and inorganic nitrogen
Amy E. Miller and William D. Bowman **283–292**

Effects of defoliation and atmospheric CO_2 depletion on nitrate acquisition, and exudation of organic compounds by roots of *Festuca rubra*
E. Paterson, B. Thornton, A. Sim and S. Pratt **293–305**

Influence of ionic strength on sodium-calcium exchange of two temperate climate soils
V.P. Evangelou and M. Marsi **307–313**

A model describing chemical interference caused by decomposing residues at different densities of growing plants
A. Sinkkonen **315–322**

Succession of microfungal assemblages in decomposing peatland plants
M.N. Thormann, R.S. Currah and S.E. Bayley **323–333**

Ammonia-oxidizing bacteria on root biofilms and their possible contribution to N use efficiency of different rice cultivars
A.M. Briones Jr., S. Okabe, Y. Umemiya, N.-B. Ramsing, W. Reichardt and H. Okuyama **335–348**

Effects of bicarbonate and high pH on growth of Zn-efficient and Zn-inefficient genotypes of rice, wheat and rye
R. Hajiboland, X. E. Yang and V. Römheld **349–357**

Volume contents **359–361**

Author index **363**
